

Service Toolkit for Customer Service (Generic) - Release Notes v1.2.2.0

Date: 2026-06-17

Package: ServiceToolkitGeneric_1_2_2_0.zip

Summary

This release addresses customer import and editability blockers in FS-free and Marketing-free managed environments.

Key Changes

- Canvas app now opens in Power Apps Studio (no ErrOpeningDocument).
- ShipEngine and ShipEngineWalkthrough removed.
- Field Service and Marketing/Email Channel dependencies removed from import manifests.
- Solution Checker passed with Critical 0 / High 0.
- StageSolution on a bare environment shows only Customer Service, Sales, and Product Management prerequisites.
- Home screen includes '+ Add your use case here' placeholder card.
- Save-as-Quote customer-link line intentionally left off per customer request.

Validation Results

App opens in Studio: Pass

Evidence: Loaded as 'Service Toolkit Pages (Editing)' with no ErrOpeningDocument

StageSolution (bare env): Pass

Evidence: 0 Field Service/Email tokens; only Service/Sales/Product Mgmt deps

Solution Checker: Pass

Evidence: Critical 0 / High 0 (Medium advisories only)

Import to CX Primary: Pass

Evidence: Import job reached 100% and ServiceToolkit updated to v1.2.2.0

Customer Handoff Notes

- Import ServiceToolkitGeneric_1_2_2_0.zip into customer environment.
- Open the app once in Studio to verify edit-mode load.
- Share any customer-specific branding and we'll layer it on top of this baseline.
